

# Four tutorials on Chinese PROSODY

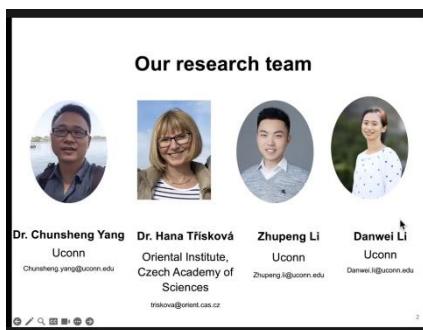

by Hana Třísková  
[triskova@orient.cas.cz](mailto:triskova@orient.cas.cz)

The tutorials provide an introduction to important aspects of Chinese prosody such as stress, chunking or intonation. They may help learners to master natural speech rhythm of Chinese. Prosodic transcription CHIPROT is used as a tool.

These four tutorials were designed for the purposes of an experiment testing the effectiveness of the prosodic transcription CHIPROT (*Chinese Prosodic Transcription*, author H.T.) in teaching Chinese as a second language. The experiment was carried out in March-April 2024 at the University of Connecticut.
